

General information: My CafeSuite trial version seems to be quite restricted - how can I change this?

Currently trial version of CafeSuite has the following restrictions:

- you can't enter more than 10 products and services into the inventory
- you can't create more than 20 customer accounts
- operators can login without giving the correct password
- it only works for 21 days

However you can also test the software without these restrictions - please just fill the following form:

<http://cafesuite.net/extend>

Or alternatively just request temporary unlock key by email.
