

CafeSuite: What are the development plans for CafeSuite?

We are currently working or planning to work on the following:

- updating program help and documentation
- dedicated 64-bit version of CafeAgent
- displaying notifications over DirectX and OpenGL games on Windows Vista/7
- finishing SQL database conversion
- possibility to use central reports database
- UNICODE release
- web-based panel for CafeSuite (for remote and simultaneous access)
- remote bill and ordering
- self user account sign-up
- credit-card/PayPal support
- user profile management
- game license key management

The above list is only supposed to indicate the current development efforts, but there are no fixed deadlines.
