

# Troubleshooting: Why it is that everytime I open CafeSuite it always displays the wrong rates? At first it's fine, but after an hour it displays a wrong rate.

It sounds like you're using cracked version of CafeStation.exe. In older versions of CafeSuite we implemented crack protection where program charges wrong rates (around 30% more) after one hour of using cracked version. Please just download the software from our website and reinstall it to fix the problem (and of course register!).
