

Features: Can the workstation lock screen be altered (skinned) to reflect my branding? Where I can customize background image in the lock screen?

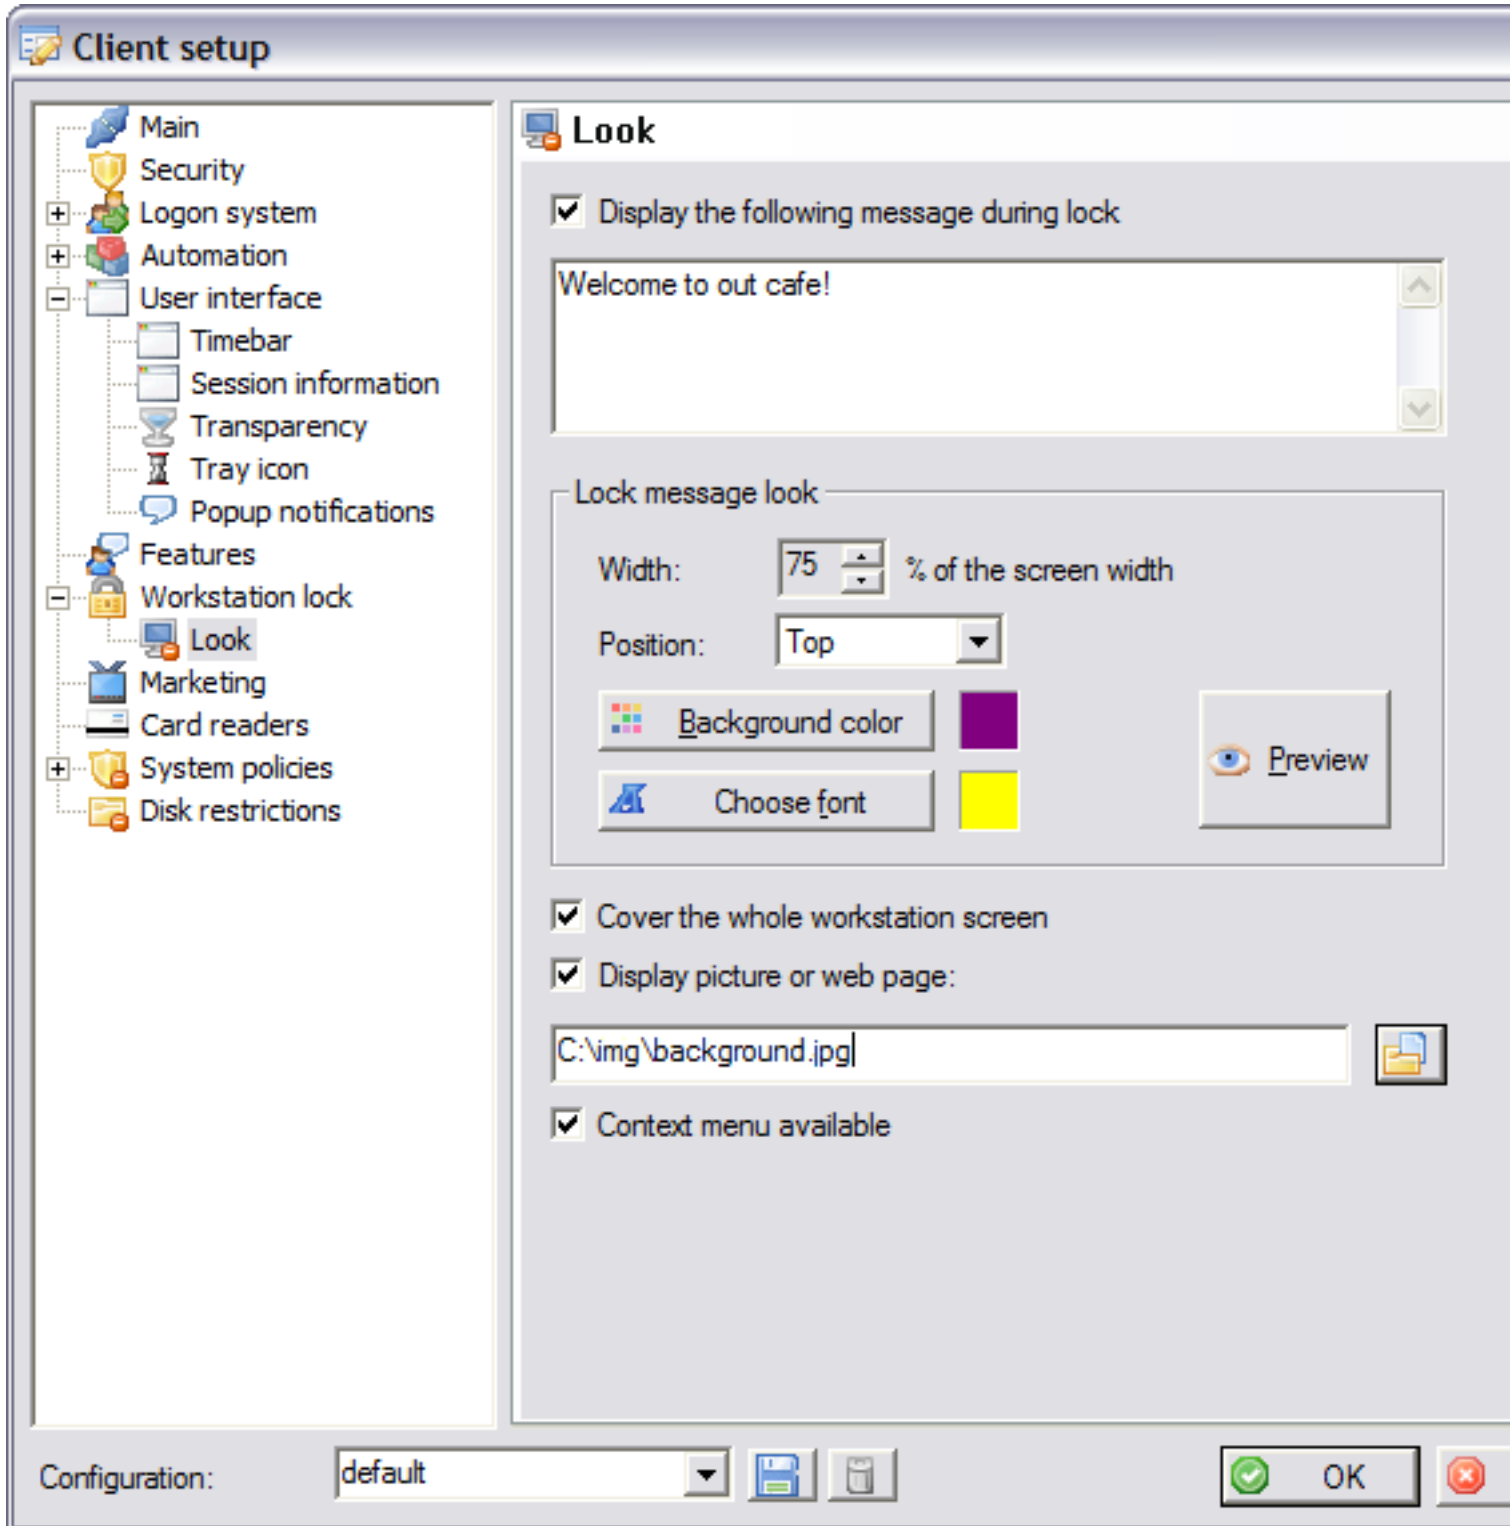

Yes, you can customize the skin of the logon window. You can also change the background of the login screen to display picture with your company logo or even a web page.

?To change the skin of the logon window please go to User interface page in client settings:

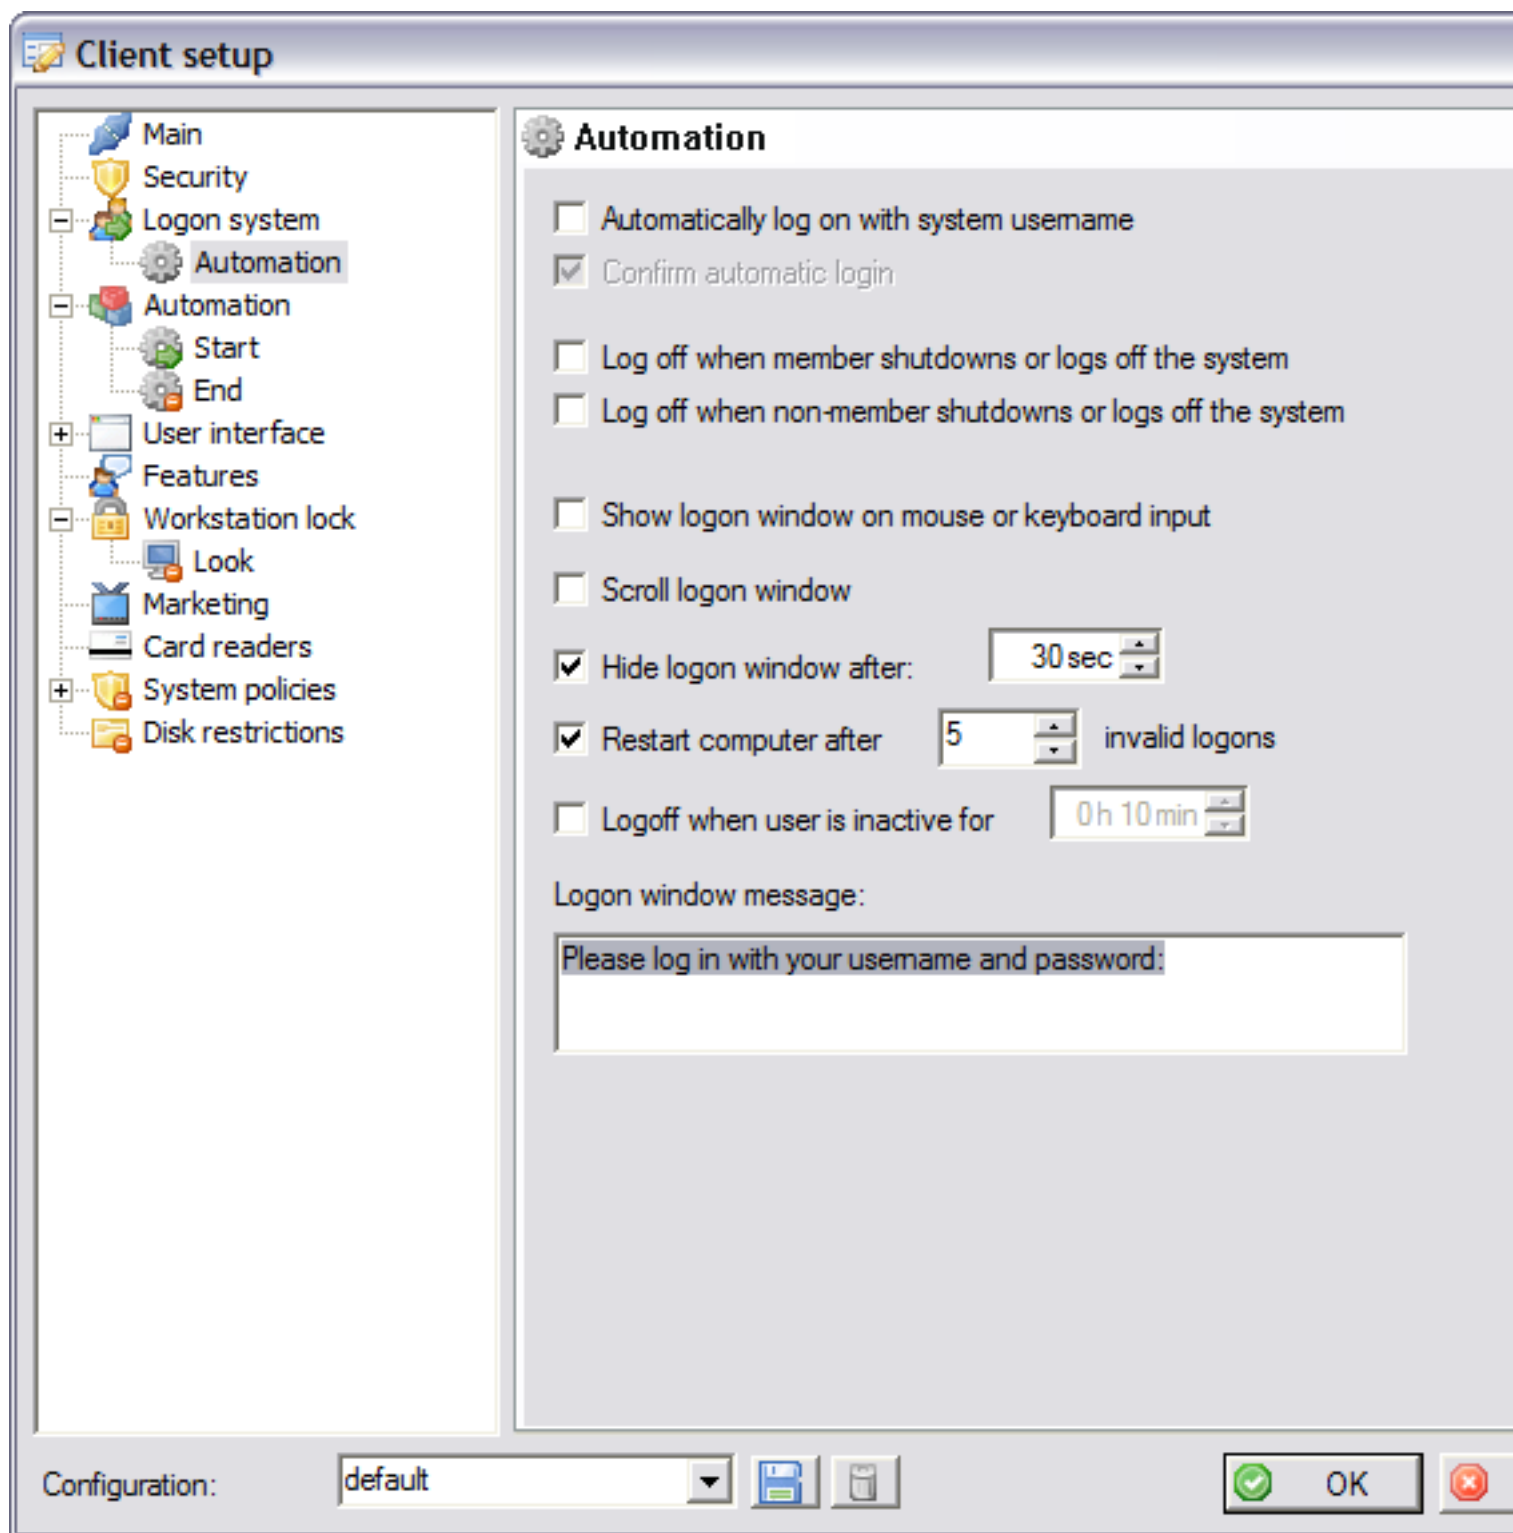

To change lock background image image go to Workstation lock/Look page:

Features: Can the workstation lock screen be altered (skinned) to reflect my branding? Where I can customize background image in the lock screen?

It's also possible to change the information displayed in the logon window on Logon system/Automation page:

Features: Can the workstation lock screen be altered (skinned) to reflect my branding? Where I can customize background image in the lock screen?
