

Recovery Module: How to uninstall CafeSuite Instant Recovery Module?

There are three ways to uninstall CafeSuite Instant Recovery Module:

- You can uninstall from the DOS screen if you press Home key before Windows starts to load (shortly after BIOS and memory check)
- You can uninstall normally from Windows Control Panel
- You can uninstall remotely from CafeStation by selecting computers, going to menu Workstation/Instant recovery and clicking Uninstall button.

Uninstallation is protected with password that you set during installation or through CafeStation. The default password is: 99999999.

Please note that you don't need to uninstall Recovery Module in case you just want to upgrade your system or install new applications. You should just enter Install mode, either from CafeStation or from DOS screen.
